

COVID-19 Safety Plan for: St. Mark's College, 5935 Iona Drive

Employers must develop a COVID-19 Safety Plan. To develop your plan, follow the six-step process described at [COVID-19 and returning to safe operation](#).

This planning tool will guide you through the six-step process. You may use this document, or another document that meets your needs, to document your COVID-19 Safety Plan.

Employers are not required to submit plans to WorkSafeBC for approval but, in accordance with the order of the [provincial health officer](#), this plan must be posted at the worksite, and on the website if there is one. This Safety Plan can also be completed from any mobile device using the [COVID-19 Safety Plan app](#).

Step 1: Assess the risks at your workplace

The virus that causes COVID-19 spreads in several ways. It can spread in droplets when a person coughs or sneezes. It can also spread if you touch a contaminated surface and then touch your face.

The risk of person-to-person transmission increases the closer you come to other people, the more time you spend near them, and the more people you come near.

The risk of surface transmission increases when many people contact the same surface and when those contacts happen over short periods of time.

Involve workers when assessing your workplace

Identify areas where there may be risks, either through close physical proximity or through contaminated surfaces. The closer together workers are and the longer they are close to each other, the greater the risk.

- We have involved frontline workers, supervisors, and the joint health and safety committee (or worker health and safety representative, if applicable).
- We have identified areas where people gather, such as break rooms, production lines, and meeting rooms.
- We have identified job tasks and processes where workers are close to one another or members of the public. This can occur in your workplace, in worker vehicles, or at other work locations (if your workers travel offsite as part of their jobs).
- We have identified the tools, machinery, and equipment that workers share while working.
- We have identified surfaces that people touch often, such as doorknobs, elevator buttons, and light switches.

Step 2: Implement protocols to reduce the risks

Select and implement protocols to minimize the risks of transmission. Look to the following for information, input, and guidance:

- Review [industry-specific protocols](#) on [worksafebc.com](#) to determine whether any are relevant to your industry. Guidance for additional sectors will be posted as they become available. If protocols are developed specific to your sector, implement these to the extent that they are applicable to the risks at your workplace. You may need to identify and implement additional protocols if the posted protocols don't address all the risks to your workers.
- Frontline workers, supervisors, and the joint health and safety committee (or worker representative).
- [Orders, guidance, and notices](#) issued by the provincial health officer and relevant to your industry.
- Your health and safety association or other professional and industry associations.

COVID-19 Safety Plan for: Corpus Christi College, 5935 Iona Drive

Different protocols offer different levels of protection. Wherever possible, use the protocol that offers the highest level of protection. Consider controls from additional levels if the first level isn't practicable or does not completely control the risk. You will likely need to incorporate controls from various levels to address the risk at your workplace.

First level protection (**elimination**) — Limit the number of people in your workplace where possible by implementing work-from-home arrangements, establishing occupancy limits, rescheduling work tasks, or other means. Rearrange work spaces to ensure that workers are at least 2 m (6 ft.) from co-workers, customers, and members of the public.

Second level protection (**engineering controls**) — If you can't always maintain physical distancing, install **barriers** such as plexiglass to separate people.

Third level protection (**administrative controls**) — Establish rules and guidelines, such as posted **occupancy limits** for shared spaces, designated delivery areas, cleaning practices, and one-way doors and walkways to keep people physically separated.

Fourth level protection (**PPE**) — If the first three levels of protection aren't enough to control the risk, consider the use of masks. Ensure masks are **selected and cared for appropriately** and that workers **are using masks correctly**.

COVID-19 Safety Plan for: Corpus Christi College, 5935 Iona Drive

First level protection (elimination): Limit the number of people at the workplace and ensure physical distance whenever possible

- We have established and posted an occupancy limit for our premises. Public Health has advised that the prohibition on gatherings of greater than 50 people refers to “one-time or episodic events” (weddings, public gatherings), and is therefore not intended to apply to workplaces. However, limiting the number of people in a workplace is an important way to ensure physical distancing is maintained. [Public Health has developed [guidance for the retail food and grocery store sector](#) that requires at least 5 square metres of unencumbered floor space per person (workers and customers). This allows for variation depending on the size of the facility, and may be a sensible approach for determining maximum capacity for employers from other sectors that do not have specific guidance on capacity from Public Health.]
- In order to reduce the number of people at the worksite, we have considered work-from-home arrangements, virtual meetings, rescheduling work tasks, and limiting the number of customers and visitors in the workplace.
- We have [established and posted occupancy limits](#) for common areas such as break rooms, meeting rooms, change rooms, washrooms, and elevators.
- We have implemented measures to keep workers and others at least 2 metres apart, wherever possible. Options include revising work schedules and reorganizing work tasks.

Measures in place

Currently, all staff and faculty are working remotely. Our building is under construction and there is no entry into the building. We are running daily check-ins with staff to ensure their physical and mental health.

All programming and services have shifted to remote delivery and no students are permitted on campus.

Upon return to work:

We have developed a comprehensive plan to minimize the number of staff on site to allow workers to keep 2 metres apart. Due to our limited space, 15 people maximum will be allowed in the building at any one time.

Health screening questionnaires will be conducted for all persons entering campus and temperature's taken. Any person presenting with fevers (a temperature of >37 degree Celsius) will be asked to leave and follow provincial guidelines of the PHO for self-isolation.

Directional signs will be placed in the college with single points of entry and exit. Hand sanitizer will be available in all offices and at entry points, classrooms and exits throughout the college.

Classes will be staggered to allow for cleaning in between and to ensure minimal contact between students. Students will not be permitted to stay on campus to discourage unnecessary congregation.

More classes will be run to allow for a reduced number of students in each class.

Masks are required whenever in the building and in all offices/areas where social distance cannot be kept.

Daily and hourly cleaning of high touch points will be used to minimize the transmission of COVID-19.

We will work with our staff to implement our workplace safety plan which trains them in workplace policies and procedures.

COVID-19 Safety Plan for: Corpus Christi College, 5935 Iona Drive

Second level protection (engineering): Barriers and partitions

- We have installed **barriers** where workers can't keep physically distant from co-workers, customers, or others.
- We have included barrier cleaning in our cleaning protocols.
- We have installed the barriers so they don't introduce other risks to workers (e.g., barriers installed inside a vehicle don't affect the safe operation of the vehicle).

Measures in place

Currently, all staff and faculty are working remotely. Our building is under construction and there is no entry for students, faculty or staff into the building. We are running daily check-ins with staff to ensure their physical and mental health.

All programming and services have shifted to remote delivery and no students are permitted on campus.

Upon Return:

Barriers (plexiglass shields) will be installed at all service counter areas and other workstations as required. Classrooms will have barriers installed at the front of the classroom

COVID-19 Safety Plan for: Corpus Christi College, 5935 Iona Drive

Third level protection (administrative): Rules and guidelines

- We have identified rules and guidelines for how workers should conduct themselves.
- We have clearly communicated these rules and guidelines to workers through a combination of training and signage.

Measures in place

Upon Return to Campus:

Directional signage will be placed in the college with single points of entry and exit. Hand sanitizer will be available in all offices and at entry points, classrooms and exits throughout the college.

Hallways will all be one directional. Movement around the building will be tightly controlled to avoid the risk of individuals coming into contact with one another.

Classes will be staggered to allow for cleaning in between and to ensure minimal contact between students. Students will not be permitted to stay on campus to discourage unnecessary congregating.

A return to work plan has been established which will minimize the number of staff on campus at any one time and mean that shared offices are only used by one staff member at a time. There will be appropriate cleaning in between office uses.

Masks will be required in all hallways and public areas. They will also be required in offices if social distancing is not possible. However, given our gradual return to work plan, we do not foresee an issue with this.

We will work with our staff to implement our workplace safety plan, which trains them in workplace policies and procedures. The purpose of these policies and procedures will be to keep students, faculty, staff and visitors safe, while making them aware of their responsibilities in contributing to a safe workplace.

Our COVID team and Human Resources Department are in communication with all staff, faculty and students regarding safety issues and concerns on a regular basis.

COVID-19 Safety Plan for: Corpus Christi College, 5935 Iona Drive

Fourth level protection: Using masks (optional measure in addition to other control measures)

- We have reviewed the information on [selecting and using masks](#) and [instructions on how to use a mask](#).
- We understand the limitations of masks to protect the wearer from respiratory droplets. We understand that masks should only be considered when other control measures cannot be implemented.
- We have trained workers in the proper use of masks.

Measures in place

Masks are required whenever in the building and in all offices/areas where social distance cannot be kept. This rule is not task specific.

Staff members will be assigned to make sure mask rules are complied with and disposable masks will be available at the entrance for anyone who does not have one.

As part of their training, workers are informed of the correct use of masks.

COVID-19 Safety Plan for: Corpus Christi College, 5935 Iona Drive

Implement effective cleaning and hygiene practices

- We have reviewed the information on [cleaning and disinfecting](#) surfaces.
- Our workplace has enough handwashing facilities on site for all our workers. Handwashing locations are visible and easily accessed.
- We have policies that specify when workers must wash their hands and we have communicated good hygiene practices to workers. Frequent handwashing and good hygiene practices are essential to reduce the spread of the virus. [[Handwashing](#) and [Cover coughs and sneezes](#) posters are available at worksafebc.com.]
- We have implemented cleaning protocols for all common areas and surfaces — e.g., washrooms, tools, equipment, vehicle interiors, shared tables, desks, light switches, and door handles. This includes the frequency that these items must be cleaned (number of times per day) as well as the timing (before and after shift, after lunch, after use).
- Workers who are cleaning have adequate training and materials.
- We have removed unnecessary tools and equipment to simplify the cleaning process — e.g., coffee makers and shared utensils and plates

Cleaning protocols

Currently all staff and faculty are working remotely. Our building is under construction and there is no entry into the building. We are running daily check-ins with staff to ensure their physical and mental health.

All programming and services have shifted to remote delivery and no students are permitted on campus.

Upon Return:

An cleaning crew will be hired and will be onsite throughout the day to do regular cleaning throughout the day, in between classes, and in public areas.

A second crew will do a full clean each night to sanitize all surfaces in the building.

The specific cleaning protocols will be determined once construction is completed and we are more aware of the layout and the cleaning that will be required.

COVID-19 Safety Plan for: Corpus Christi College, 5935 Iona Drive

Step 3: Develop policies

Develop the necessary policies to manage your workplace, including policies around who can be at the workplace, how to address illness that arises at the workplace, and how workers can be kept safe in adjusted working conditions.

Our workplace policies ensure that workers and others showing symptoms of COVID-19 are prohibited from the workplace.

- Anyone who has had **symptoms of COVID-19** in the last 10 days must self-isolate at home.
- Anyone who has been identified by Public Health as a close contact of someone with COVID-19.
- Anyone directed by Public Health to self-isolate.
- Anyone who has arrived from outside of Canada must **self-isolate for 14 days and monitor** for symptoms.
- Visitors are prohibited or limited in the workplace.
- First aid attendants have been provided **OFAA protocols** for use during the COVID-19 pandemic.
- We have a **working alone policy** in place (if needed).
- We have a **work from home policy** in place (if needed).
- Ensure workers have the training and strategies required to address the risk of violence that may arise as customers and members of the public adapt to restrictions or modifications to the workplace. Ensure an appropriate **violence prevention program** is in place.

Our policy addresses workers who may start to feel ill at work. It includes the following:

- Sick workers should report to first aid, even with mild symptoms.
- Sick workers should be asked to wash or sanitize their hands, provided with a mask, and isolated. Ask the worker to go straight home. [Consult the **BC COVID-19 Self-Assessment Tool**, or call 811 for further guidance related to testing and self-isolation.]
- If the worker is severely ill (e.g., difficulty breathing, chest pain), call 911.
- Clean and disinfect any surfaces that the ill worker has come into contact with.

Step 4: Develop communication plans and training

You must ensure that everyone entering the workplace, including workers from other employers, knows how to keep themselves safe while at your workplace.

- We have a training plan to ensure everyone is trained in workplace policies and procedures.
- All workers have received the policies for staying home when sick.
- We have posted signage at the workplace, including occupancy limits and effective hygiene practices. [A customizable **occupancy limit poster** and **handwashing signage** are available on worksafebc.com.]
- We have posted signage at the main entrance indicating who is restricted from entering the premises, including **visitors** and **workers** with symptoms.
- Supervisors have been trained on monitoring workers and the workplace to ensure policies and procedures are being followed.

COVID-19 Safety Plan for: Corpus Christi College, 5935 Iona Drive

Step 5: Monitor your workplace and update your plans as necessary

Things may change as your business operates. If you identify a new area of concern, or if it seems like something isn't working, take steps to update your policies and procedures. Involve workers in this process. [Reviewing and updating your COVID-19 safety plan: A guide for employers](#) will help you review your safety plan to ensure it's effective and functioning properly.

- We have a plan in place to monitor risks. We make changes to our policies and procedures as necessary.
- Workers know who to go to with health and safety concerns.
- When resolving safety issues, we will involve joint health and safety committees or worker health and safety representatives (or, in smaller workplaces, other workers).

Step 6: Assess and address risks from resuming operations

If your workplace has not been operating for a period of time during the COVID-19 pandemic, you may need to manage risks arising from restarting your business.

- We have a training plan for new staff.
- We have a training plan for staff taking on new roles or responsibilities.
- We have a training plan around changes to our business, such as new equipment, processes, or products.
- We have reviewed the start-up requirements for vehicles, equipment, and machinery that have been out of use.
- We have identified a safe process for clearing systems and lines of product that have been out of use.

Be advised that personal information must not be included in the COVID-19 Safety Plan

Personal information is any recorded information that uniquely identifies a person, such as name, address, telephone number, age, sex, race, religion, sexual orientation, disability, fingerprints, or blood type. It includes information about a person's health care, educational, financial, criminal, or employment history. Visit <https://www.oipc.bc.ca/about/legislation/> for more information.
